WhenU Save/SaveNow

WhenU Save/SaveNow, with TrueRelevance™, is advertising software that delivers exclusive offers and money-saving coupons right to your desktop - based on the web content that interests you.

Both WhenU Save and SaveNow are bundled with our partners' downloadable products, such as audio/video programs and online games. The advertising revenue generated from the WhenU products subsidizes the cost of the software, so consumers are able to download the software they want without paying subscription fees.

Both Save and SaveNow products are the same utility. The difference is that you can also *directly* download WhenU SaveNow from our website.

WhenU Save/SaveNow offers you value, choice, convenience, and relevance. We work with the top advertisers in retail, travel, and financial services to provide you with the best and most unique savings opportunities on the Web. Why waste valuable time navigating search engines and Web destinations? WhenU's proprietary technology delivers what you want, when you want it. And to ensure that WhenU Save/SaveNow's targeted ads aren't intrusive, we limit their frequency.

With Save/SaveNow, as with all WhenU products, your privacy is assured. WhenU software doesn't use cookies, profiling, or any other means to track which Web sites you visit, nor do we collect any personally identifiable information about you. WhenU software is engineered to have low or no impact on your computer's performance. And, if you decide that WhenU Save/SaveNow isn't for you, you can uninstall it using Windows Add/Remove at any time.

TrueRelevance™

Enhanced functionality that provides immediate access to real-time comparison shopping results - giving you better choices and saving you time and money.

Customer Support

Every WhenU advertisement prominently displays our toll-free Customer Support phone number - (866) WHENU-11.

All WhenU products can be easily uninstalled at any time by using the Windows Add/Remove function. However, you may also be required to uninstall other software if that software came supported by ads from WhenU.
